

McBride Energy Services, LLC Appoints Project Engineer

Fast-Growing Renewable Energy Company Deepens Staff

2014Jul06, Bristol, VA - McBride Energy Services, LLC (MES) announced today that Kevin Carpenter, PE has joined the firm as Project Engineer. Kevin arrives with decades of experience as an engineer and technical project manager. In his new role Kevin will manage all aspects of project implementation and facilitate contracts and communication for landowners, investors, and vendors. With multiple projects pending, Kevin will hit the ground running.

Tal McBride, Managing Partner at MES, said "Kevin's wealth of experience has already made him a key addition to the MES staff. We view his appointment as a signal of our leadership in the burgeoning renewables industry".

About McBride Energy Services, LLC

MES develops renewable energy projects in solar, wind, and biomass. MES builds partnerships between landowners, investors, and contractors to design, finance, permit, implement, commission, broker, maintain, and manage projects. MES' mission is renewable energy projects that build wealth for partners and carbon-free equity for the entire planet.
